

# Function on Tuple

1. len()
2. max()
3. min()
4. sum()
5. sorted()
6. any()
7. all()

# Methods on tuple

1. append() ✗
2. extend() ✗
3. insert() ✗
4. index() ✓
5. count() ✓
6. remove() ✗
7. pop() ✗
8. clear() ✗
9. reverse() ✗
10. sort() ✗
11. copy() ✗

From list, the operation are not possible as tuple are immutable.

⇒ Tuple majorly used for data which doesn't change.

⇒ write-protected

⇒ generally faster than list & memory efficient.
